EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science, Minor in Financial Technology

Aug. 2023 – May 2027

- Concentrations: Artificial Intelligence, Human-Computer Interaction **GPA: 3.87/4.0**
- Relevant Coursework: Data Structures, Algorithms, Intro to AI, ML, UI Design, Finance & Investments

TECHNICAL SKILLS

Certifications: AWS Certified Solutions Architect-Associate, AWS Certified AI Practitioner

Languages: Python, SQL, Java, JavaScript, C, HTML, CSS, Solidity

Frameworks & Libraries: React.js, Node.js, JUnit, Django, Apache Airflow, MCP, Pandas, Scikit-learn, PyTorch

Tools: AWS, Git, Grafana, Docker, Microsoft Office (Excel), Jira, Confluence, Android Studio, Adobe Creative Suite

EXPERIENCE

Amazon.com, Inc.

Bellevue, WA

Supply Chain Manager Intern, Amazon Air

May 2026 – Aug. 2026

- Upcoming role for Summer 2026, cross-functional business data analysis for Amazon Air fleet of 100+ cargo aircraft

Amazon Web Services, Inc.

Seattle, WA

Cloud Software Engineer Intern, AI/ML

May 2025 – Aug. 2025

- Built agentic AI assistant grounded in official AWS knowledge for certification prep with chat and quiz interfaces
- Deployed architecture on AWS, using React.js, Lambda, Bedrock (w/ Model Context Protocol), and DynamoDB
- Championed technical pivot from RAG to MCP architecture by presenting comparative analysis of KPIs to leadership
- Developed MCP agent (Boto3) to autonomously query 100,000+ AWS docs, cutting hallucinations ~85% over RAG

Volvo Group

Greensboro, NC

Data Scientist Intern

Jan. 2025 – May 2025

- Co-invented a patent-pending tuning method for driver assist systems, increasing steering lifespan/handling ~15%
- Developed 6 Python vehicle dynamics modules to process raw test fleet data into high-quality analytics datasets
- Delivered 3 Grafana dashboards that synthesized steering performance data into clear, decision-oriented insights
- Built decision-tree algorithm for root cause analysis of manufacturing issue, isolating \$50M defect areas in 1 week

LEADERSHIP

Georgia Institute of Technology, College of Computing

Atlanta, GA

Senior Teaching Assistant – Object-Oriented Programming (CS 1331)

Jan. 2024 – Present

- Ensure course efficiency for 1,000+ students through assignment grading/troubleshooting and teaching Java class section
- Introduced interactive software to analyze 200+ real-time responses to in-class practice, optimizing data-driven teaching
- Navigate diverse communication styles to bridge professor goals and student needs, leading to +15% student satisfaction
- Mentored all 27 students in assigned recitation to achieve a 4.0 course GPA through engaging instruction and 1:1 guidance

PROJECTS

Economic Data Analysis: Interest Rates & Well-Being | NumPy, PyViz, Pandas

Aug. 2024 – Jan. 2025

- Analyzed 100k+ data points from UN/OECD sources to model relationships between interest rates and life satisfaction
- Integrated/cleaned 3 data sources (CSV, JSON, web-scrape), resolving inconsistencies for improved data integrity/quality
- Conducted correlations, box-and-whisker analysis, similarity assessment, and outlier detection with NumPy and Pandas
- Built 5 interactive visualizations/statistical summaries, translating complex economic analysis into non-technical insights

Personalized Fitness/Meals Scheduling Solution | Figma, User-Centered Design (UCD)

Aug. 2025 – Jan. 2026

- Led UCD process conducting 8 stakeholder interviews and affinity mapping to define core personas/user pain points
- Translated research into 5 utility criteria to build a recommendation engine for automated meal and workout scheduling
- Critically evaluated 12 lo-fi prototypes against a feasibility/impact matrix to select and refine the most viable solution
- Developed a hi-fi Figma ecosystem, conducted System Usability Scale testing to identify user friction for future iteration
